An excerpt from Appendix II - Spiritual Experience...

“With few exceptions our members find that they have tapped an unsuspected inner resource which they presently identify with their own conception of a Power greater than themselves. Most of us think this awareness of a Power greater than ourselves is the essence of spiritual experience. Our more religious members call it ‘God-consciousness.’ Most emphatically we wish to say that any alcoholic capable of honestly facing his problems in the light of our experience can recover, provided he does not close his mind to all spiritual principles. He can only be defeated by an attitude of intolerance or belligerent denial. We find that no one need have difficulty with the spirituality of the program. Willingness, honesty and open mindedness are the essentials of recovery. But these are indispensable.
